

(1) In retrospect, what could you have done better to reduce the time you spent solving this assignment?

I would probably review the lecture notes on ADT's more so that I wouldn't need to keep referencing them while working on the homework.

(2) What could the Principles of Software staff have done better to improve your learning experience in this assignment?

I think overall the material was enough to help me complete this homework, at times I was a little confused about the test case coverage in the instructions. However, these questions were answered in the discussion forum.

(3) What do you know now that you wish you had known before beginning the assignment?

I wish I had known more about the specification writing for each function as I spent a lot of time learning more about how to correctly write these. I also wish I had known a little bit more about writing test cases to cover certain amounts of code.
