Reflection

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?

I had to spend a lot of time editing my hw 4 code to work for this assignment, would of liked to done hw 4 more comprehensively to account for this.

2. What could I (the instructor) have done better to improve your learning experience in this homework?

I think the homework was a pretty good representation of the class content, and good practice to help me understand the concepts. I do think the output explanation could have been better

3. What do you know now that you did not know before beginning the homework?

I was confused about how to improve coverage for test cases but now have a better understanding of how to do so.
